0.49	Central Ave	Moreno St (0.03 miles S)	2004	37,191

Data Note: The Traffic Profile displays up to 30 of the closest available traffic counts within the largest radius around your site. The years of the counts in the database range from 2012 to 1963. 70% of the counts were taken between 2001 and 2012 and 98.7% of the counts were taken in 1990 or later. Traffic counts are identified by the street on which they were recorded, along with the distance and direction to the closest cross-street. Distances displayed as 0.00 miles (due to rounding), are closest to the site. A traffic count is defined as the two-way Average Daily Traffic (ADT) that passes that location.
